Letter of Recommendation

To Whom It May Concern,

I am writing to strongly recommend Dr. Jiaping Xiao's application for your faculty position. Over the past few years, as his supervisor and work manager, I have witnessed his profound commitment to broadening the horizons of scientific research and fostering interdisciplinary collaborations that challenge conventional boundaries.

Jiaping has consistently demonstrated exceptional research skills, particularly **in the cross fields of intelligent systems, robotics and artificial intelligence**. He has shown extraordinary expertise and technical proficiency in these complex and challenging fields, as evidenced in his Ph.D. project and his publications. So far, he has published over 30 papers in various filed top-tier journals. All these publications and research achievements have strongly demonstrated his exceptional research skills and courage to solve challenging problems. Jiaping also managed to turn the research into practical applications with one international patent. He has also collaborated with students from various schools in winning the gold medal in the 7th China International College Students 'Internet+' Innovation and Entrepreneurship Competition (**130 out of 22.8 million groups**). His research outcomes have successfully turned into grants supported from external entities.

Beyond his excellent interdisciplinary research skills, Jiaping also excels in teamwork and leadership abilities. He has led a research project funded by nearly 1.5 million dollars from the Singapore Economic Development Board. Over the past three years, **he has successfully mentored over 4 PhD students, 4 master students and 18 undergraduate students, including 15 FYPs, 2 URECA projects, and 1 CN Young project**, and helped them in collaborating research to publish papers in top journals and conferences. Most of them have developed interdisciplinary skills under his guidance and found satisfactory careers in companies and institutes. Besides, he led the NTU graduate student associate (GSA) academic committee for 2 years as a director and brought a lot of effort to activate the academic atmosphere, which received appreciation of excellent contribution from NTU graduate college. These abilities are invaluable for him to continue guiding students and contributing to the academic activities in your university and your school.

I believe Jiaping possesses the academic excellence, teaching vision, and collaborative spirit that are essential for success in your position. He will undoubtedly be a talent to your university, and I strongly recommend his application. Thank you for considering my recommendation.

Sincerely,

A handwritten signature in black ink, appearing to read 'Mir'.

Assoc. Prof. Mir Feroskhan
