Letter of Recommendation

To Whom It May Concern,

I am glad to recommend Dr. Jiaping Xiao for your faculty position, based on my extensive interactions with him as his instructor in the lab course "Familiarization of ATC Tower Operations and Flight Sequencing" and as the chair of his Ph.D. qualification examination panel.

Jiaping served as a teaching assistant in my lab course, which we conducted in collaboration with Changi Airport's management and air traffic control teams from year 2022 to 2023. Jiaping displayed an exceptional ability to assimilate complex air traffic management (ATM) concepts quickly and effectively. His rapid adaptation and deep intellectual curiosity enabled him to not only grasp but also enhance the course material by integrating his extensive knowledge from aerospace engineering and AI, enriching the learning experience for all participants. His innovative approach to teaching and his ability to relate interdisciplinary knowledge to ATM operations have been highly appreciated by students. Jiaping's dedication and enthusiasm in teaching complex concepts in an accessible manner have significantly contributed to the success of the course, making it one of the most well-received modules within our institute.

Furthermore, as the chair of Jiaping's Ph.D. qualification examination, I have observed his adaptive research capabilities and his fearless approach to addressing and solving challenging research questions. His determination and the breadth of his scientific inquiry across multiple interdisciplinary fields are not only commendable but align perfectly with the objectives of your position. Jiaping's unique experience of academic excellence, innovative thinking, and leadership within and beyond his primary research domain exemplifies the qualities sought in your position. He has shown a consistent commitment to applying scientific insights to practical challenges, demonstrating potential for significant societal and industry impact.

I am confident that Jiaping would not only enhance his ability to contribute to pioneering world-leading scientific advancements in your university and school but also allow him to serve as an inspiring researcher to push the robotics and autonomous systems industry in your area. Thank you for considering Jiaping Xiao for this faculty position.

Sincerely,

Assoc. Prof. Sameer Alan

Director of the Air Traffic Management Research Institute

Nanyang Technological University
